DETAILED ACTION

Page 2

1. This is a first office action in response to application no. 10/536,998 filed on June 6th 2003 in which claims 1-11 are presented for examination.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claim 1 is rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent Application Publication no. 2006/0160436 A1 to Oka et al. Although the conflicting claims are not identical, they

Art Unit: 2621

are not patentably distinct from each other because the limitations of the present patent application are somewhat similar to the cited Patent Application Publication no.

Therefore, it is considered obvious that one skilled in the art at the time of the invention would recognize the advantage of modifying the method and system for evaluating moving image quality of a screen of the present Patent Application publication by incorporating Oka's teachings as shown in US Patent Application publication 2006/0160436 A1 for the same purpose of measuring a screen motion image quality without electric synchronism as taught by Oka (See [0007]).

Claims 2-11 are rejected by dependency to claim 1.

NOTE: The Applicant is urged to indicate all the co-pending Patent Applications as well as published Patents similar to the claims of the present application in order to expedite while avoiding delays of Terminal Disclaimers.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Bridges et al. (US Patent no. 3897150) teaches scanned laser imaging and ranging system.

Reznichenko et al. (US Patent no. 5094523) teaches bidirectional light steering apparatus.

Application/Control Number: 10/536,998 Page 4

Chism, Jr. (US Paten no. 5692808) teaches passively modulated push broom display.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gims S. Philippe whose telephone number is (571) 272-7336. The examiner can normally be reached on M-F (10:30-7:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mehrdad Dastouri can be reached on (571) 272-7418. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
